General health
- **Full checkup** — Including weight and height.
- **Sleep habits** — Discuss at your annual exam.
- **Thyroid (TSH) test** — Discuss with your doctor or nurse.
- **HIV screening** — Get this test if you are at risk for HIV infection (unprotected sex, sexually transmitted disease, or used drugs with needles).

Heart health
- **Blood pressure test** — At least every two years.
- **Baseline cholesterol panel** — Total, LDL, HDL, and triglycerides.

Diabetes
- **Blood glucose or A1c test** — Get screened if you have sustained blood pressure greater than 135/80, take medicine for high blood pressure, or are at risk for developing diabetes.

Breast health
- **Breast self-exam** — Become familiar with your breasts so you can identify any changes and discuss with your doctor or nurse.

Reproductive health
- **Pap test** — At least every three years.
- **Pelvic exam** — Yearly, beginning at age 21.
- **Sexually transmitted infection (STI) tests** — Both partners should get tested for STIs, including HIV, before initiating sexual intercourse. Get a chlamydia test yearly until age 24 if sexually active. After age 25, get this test if you have new or multiple partners.

Mental health screening
- Discuss with your doctor or nurse.

Eye and ear health
- **Comprehensive eye exam** — Discuss with your doctor.
- **Hearing test** — Every 10 years.

Skin health
- **Skin exam** — Monthly self-exam of skin and moles and as part of a routine full checkup with your doctor or nurse.

Oral health
- **Dental cleaning and exam** — Every 12-24 months; discuss with your dentist.

Immunizations
- **Seasonal influenza vaccine** — Yearly.
- **Tetanus-diphtheria-pertussis booster vaccine** — Every 10 years.
- **Human papillomavirus (HPV) vaccine** — Up to age 26, if your vaccine series is incomplete, discuss with your doctor or nurse.
- **Meningococcal vaccine** — Discuss with your doctor or nurse if you are a college student or military recruit.
